

# Student time bank

**Platform to connect two persons in order for them to help each other**

As prices rise, students have a hard time managing their budget. But they have time and plenty of energy to provide. So what if they went and lived with an elderly person who could benefit from all this youthfulness in return for a home and food?

**Allow people to give their time instead of money to help**

**Free and reciprocal help for those in need**

**Create social link for isolated person**
